

A Trip down Memory Lane

Life on CUB campus remains unforgettable to this day. I was pursuing M.A. in Development Studies. However, it was strange that I had more friends in the Department of Environment Sciences than in mine. The worst part of studying at CUB was not having our own campus. Not many co-curricular activities took place. Memories of shouting in the corridors, treats from friends for no reason, making each other's sketches on the board, communicating with friends in the class in the traditional way (passing chits), bunking lectures, logging into our Facebook accounts while Mr. Ashok Singh was busy doing his work in the computer lab, hiding someone's slippers, talking in the library (a silence zone), gossiping in the photocopy and printout line, irritating Mr. Dheerendra Singh (Asst. Academics) all the time, sleeping during boring lectures, playing tic-tac-toe with friends, dancing when boring lectures got over, finishing the semester exams in an hour and then disturbing others so that they could come out quickly, planning to issue a book from the library when only one copy of it was available, these are recollections locked up in my memory casket. I'll cherish these moments throughout my life. I also would like assert that while I may possibly sound mischievous and flippant I am indebted to my teachers and friends for the great opportunity to learn in a liberal, democratic set-up."

- Vatsala Shanker, M.A. in Development Studies (2010-12), School of Social Sciences and Policy

Neologism as Mainstream Debate

"I am delighted to have an opportunity to express my experiences as a student of Central university of Bihar. I joined CUB in the year 2010 as a student of Master in Computer Science. I was at a nascent stage of academic achievement and required a lot of guidance. I feel education is fired by a passion for adventure and a good career. Passion, vision and mission are the watchwords in education.

It was an exciting experience to be part of CUB, to understand and learn effectively, in association with hands-on, practical education and training. Initially this multiplicity of learning experience was a little overwhelming but today I cherish the relationship I have forged with the IT world and I value diverse perspectives because of the cosmopolitan culture of CUB.

I have also witnessed divergence in views among teachers, students and V.C. sir but issues were sorted out and brought to convergence. Furthermore, being a first batch student of M.Sc. (Computer Science) and M.Tech (Computer Science), we appreciate the effort made to prepare a plan to help us fit in with the needs of industry. If research and industrial training could be made a part of the learning process we would gain an advance edge.

A few humble suggestions from my side are to include debating with National and International universities, inviting reputed companies for placement and organizing excursions to upgrade students. Finally, I conclude by saying that CUB has the ability to convert weaknesses into strength, obstacles into stepping stones and defeat into triumph. I wish CUB gains International standing and sets a record which cannot be obliterated. I am so proud of my Alma Mater."

- Shalvee Sinha, M.Sc. (CS); Session: 2010-12, Pursing M.Tech (CS), CUB

Nostalgic Bytes

"I still vividly remember my first day in college. I was so excited to meet new people. College felt like a liberation for me since I was far away from my family. For the first time I was separated from them.

It was a bit difficult at first to be with people I never knew. I didn't know how I should behave or whether I should just try to fit in. Eventually, everything went worked out smoothly. I met wonderful friends who are still my best buddies even now. Every time we meet up, we never fail to recall how we were back in CUB campus; how we were moulded to what we are now. College is a dry run for life. It is a training ground for hard-working people and becoming successful in life. University life is WAY different from secondary school life! The environment, especially Central University of Bihar Campus, is cool and amazing. Different people from all over the country have made this campus special for me. Like most of the people in their first week, I was alone. The Orientation Programme was enlightening. Then I found my feet. Now I have wings to fly."

- Subodh Kr. Himanshu

My Gratitude Diary

*"For every lesson taught,
For every mistake corrected,
For every dream encouraged,
You can never thank them enough."*

I am grateful to Vice- Chancellor Sir for his valuable guidance in showing me an innovative path. I would definitely like to place on record my thanks for his constant encouragement. Lastly, I would like to acknowledge each one who, though they remain unmentioned, directly or indirectly, has been connected with my life at CUB. The staff of Central university of Bihar, Patna as a whole, has extended understanding and cooperation during the two years that I spent with them.

There are so many loving and bitter experiences that I appreciated while pursuing my M.Sc. degree. I often miss my Patliputra Boys Hostel where I used to reside during my college days, the proposed hostel by university administration. I felt it was a home away from home. Such parental care in a hostel was a matchless experience.

An incident that occurred in hostel is unforgettable for all CUBians who were party to it. I don't remember the date and day but my third semester was in progress. I was in Room no 07 Patliputra. My roommate was from Rajasthan (Mahipal) and he was pursuing M.Sc. Mathematics. Early in the morning he complained that he had stomach pain. I just gave him basic medicine and first-aid thinking he would be all right. But the condition worsened and he complained of severe pain. What could I do? Being the Hostel Representative I had to take immediate initiative. I called up our Assistant Registrar (Admin) Mr. Vipul Srivastawa and told him about the situation. I don't know how VC Sir came to know about the matter. It was working hour at office and most probably he was on his way to the university office. The moment he came to know about Mahipal, he changed his route and reached the hostel. Immediately he made a call to Kurji Hospital and made the necessary arrangement. He waited with us for around 45 minutes overseeing the smooth coordination till we reached hospital. Meanwhile he recounted so many experiences of his Ph.D. days and stay duration at UK. I felt privileged to talk with him on that occasion.

Now I come to the finest slice of my life as student at CUB. I admit that the fun I had while learning at CUB is still a treasured remembrance. Today I recollect those moments when we were asked to put the mobiles into silent mode in the classroom, the last minute preparation and overnight study for any exam, the internal marking, the bus comedies, the perpetual attendance scarcity, the escape from seminars after refreshment and many more moments with so much fondness. Thank you so much CUB Times for asking me to gather those reminiscences. Currently I am working in New Delhi in the IT sector in NOIDA, and I owe immeasurable thanks to my Alma Mater, CUB."

- Siddharth Sidhu

Musings on Campus Life at CUB

I enjoyed university life at CUB. I felt secure as a student and had many reasons to enjoy life as a CUBian. However, the reason I enjoyed myself was because of friends, the stimulating classes and the state of the art campus facility. I was glad to be a student at CUB.

I made many friends across different departments. Thanks to them, I enjoyed attending classes. If I had trouble in class, they helped me understand concepts. Even those classes that I was uninterested in became enjoyable. We learnt together. I also picked an acquaintance with many seniors who upset me but that was temporary. Seniors taught me how to gain confidence. They gave me textbooks, articles and above all the hope and assurance of placement. I was always concerned about it at the beginning! The values that I was able to learn from them were cooperation and team work.

Second, the classes helped me to study the inter-relationships between Development and Environment. I felt stimulated by such discussions because we are living in the era of competitive capitalism, where we must have awareness and knowledge of the wicked but necessary inter-relationship between development goals and our environment. I was glad to study these subjects in the context of the present-day development pattern. I am looking forward to applying my knowledge to field-work and real life experience as I discharge my duty as Programme Officer, Parivartan.

In conclusion, I appreciated the facilities of the university, which were excellent. The library was well-equipped. Avant-garde innovation is the catchphrase for the betterment of all at CUB and we learnt through a process of collective reasoning. Learning together has actually become my maxim.

- *Bimlesh Bhagat, Master in Development Studies, 2010 – 2012, Programme Officer (Health, Nutrition and Sanitation), Parivartan Project, Siwan*

Nostalgic Bytes

"I am privileged to have been a pupil of the first batch (2009-11) of the Central University of Bihar which was established in the year 2009. This university has a research based focus propelling students towards higher studies. We have done our master programme in Development Studies both in theoretical and practical mode. In this way, we conducted short surveys, did documentation on socio-economic themes and also participated in seminars held in renowned institutions like XLRI Jamshedpur. Our learning methodology is entirely different as it works on classroom presentation, field work and group oriented studies. The most important mechanism of learning we adopted was an internship of 45 days duration in different non-governmental organizations. Our master thesis which underwent a rigorous check right from preparing of proposal to finishing of the thesis was a class in itself. The unforgettable moments I shared with my friends, professors and research associates are simply beyond words. Thank you CUB Times for giving me a voice."

- *Mohit Kumar, Master in Development Studies, 2009-2011*

CUBAA: CUB Launches Central University of Bihar Alumni Association

Developing and maintaining a robust Alumni Association is indispensable for the evolution and progress of an institution. The idea of forming an association of past CUB-ians stemmed from the desire to connect with and develop a database of information about Central University of Bihar's Alumni. The CUB Alumni Association (CUBA) is a platform to bring together and regroup the former students and staff of CUB under one roof. It helps to inculcate an enduring spirit of amity, camaraderie and openness among its members and cultivate a strong sense of educational and cultural belonging. An alumni association provides a forum to the alumni for an exchange of ideas on academic, cultural and social issues by organizing re-union activities among its alumni members. It helps to maintain the updated and current information of all alumni. An alumni network provides room for improvement of academic and cultural ties among current and ex-students. The Association will be organizing Alumni Meets and other social events, publish newsletters or magazines and raise funds for the organization. This will not only facilitate effective and faster communication among all alumni members but also keep them updated about the Association's activity apart from helping them know about their friends and fellow members. In order to maintain a strong network established over the years, we request all alumni to keep their profiles updated at all times. Your active cooperation and support to the Alumni Association in any form will go a long way in making this Association an effective platform for interaction and also contribute towards Alma Mater's expansion and national evolution. To be a part of the CUB's Alumni Association, you may register yourself at the link below:
